

IC3D

For 3D Printers, By 3D Printers™

About IC3D

From prototyping to production, IC3D transforms digital designs into custom products. Using state of the art equipment, design and scanning software and the highest quality consumables to bring your designs to life.

IC3D's customers aren't just getting the best services and products. They're getting the trust, confidence, and security that can only come from a team who designs and creates services and products for themselves first, and then market second.

IC3D filament is developed exclusively for 3D printers and manufactured in Ohio, USA, by us. 100% satisfaction and a trouble-free experience are the core components of our culture.
